

# Open your gate with an app.

## Introducing Fluss

Open your gate, garage, boom or magnetic lock using your phone. Control who has access to your property without handing out keys or remotes.

Invite friends, family members or housekeepers to access at the times you want, and prevent them from accessing when you don't. Fluss is a smartphone app that connects to your gate, garage, parking barrier or front-door, and gives you complete control.

Our secure, POPI and GDPR compliant cloud-based access logs keep track of when verified users access your property, and allow you to revoke access at anytime, right from the app. Administer large numbers of people quickly and easily with our powerful website, and see all the reports you need in real time.

### Pricing

Fluss service	
Home and Private use	Free
Commercial Use	R10 per user per month
Residential Complexes / Estates	R5 per user per month

Device Price:

# R899

Excluding VAT

# Secure.

# Smart.

# Simple.

#### **POPI and GDPR Compliant:**

Cloud based access logs that are POPI and GDPR compliant.

#### **Latest Encryption Standards:**

Bank-level encryption standards that protect you from gaining unauthorised access.

#### **Verified Users:**

2-factor user verification and authentication ensure that the users are who they say they are.

#### **iOS or Android:**

No need to buy or carry multiple remotes – easy access on any modern smart phone.

#### **No Airtime Needed:**

Works even when you have no airtime or data, and works when there is no signal.

#### **Control Almost Anything:**

Gates, booms, turnstiles, doors, barriers: almost anything can be controlled by Fluss.

#### **Easy User Administration:**

Add or revoke users from anywhere right inside the app, or use the powerful website for controlling large groups of users

#### **Access Sharing and Reports:**

Easily invite visitors for pre-determined dates or only before or after certain times.

#### **Works with Your Existing System:**

Intuitive user interface that works in parallel with any existing systems you already have.

## Technical Specifications

Feature	Details
Frequency	2.4 - 2.5 GHz
Transmit power	+10 dBm
Receiver sensitivity	-98 dBm
CPU	Xtensa® 32-bit LX6 Dual-core processor
Cryptography	AES-HASH(SHA-2) - Hardware assisted
Input voltage range	5 - 28 V
Operational currents (average)	90 mA
Operational Temperature	40 - 125°C
Channels	1,2 or 3
Max switching current	500mA
Max users per device	Unlimited
